

WHAT WE'RE DOING

Over the past few months, I have felt so fortunate to work in technology and to work alongside the brilliant technologists we have on staff here at Do Space. Moving quickly and adapting to the ever-changing nature of technology isn't just something we endure — we love the challenge of meeting the needs of our community as they shift over time.

Do Space works alongside students, parents, and job-seekers, as we — together — navigate uncertainty and plan for the future. Take a look below for more information about our new programs and services we've launched this fall, especially for kids and skill-builders.

Sincerely,

Rebecca Stavick

Executive Director

NEW DIGITAL PROGRAMS

In response to the evolving nature of school this fall, Do Space remixed our popular kids programs into a new After School Club to better meet the needs of busy parents and students.

Hosted entirely online, our new After School Club is designed to provide STEM learning opportunities to elementary and middle school students across the state of Nebraska. And like all Do Space programs, it's 100% free.

After School Club is hosted every weekday afternoon (except Fridays) with a fresh activity every day, including:

Monday:

Computer Programming & Design

Tuesday:

Learn How to Code

Wednesday:

Engineer & Maker Activities

Thursday:

Surprise Day!

More information can be found at dospace.org/afterschool.

VIRTUAL JOB INTERVIEW LAB

Most businesses have transitioned to online video conferencing to interview potential employees, but many community members do not have the equipment or bandwidth needed to conduct a live video job interview at home.

In response to our community's needs, we launched a Job Interview Lab at Do Space to assist members who need access to high-speed internet, a web camera, and headphone equipment, and a distraction-free environment to help job candidates make a great first impression during their interview.

Bookings can be made online at www.dospace.org
or by calling 402-819-4022.

The Omaha community has always turned to Do Space for opportunities to acquire new, marketable skills.

This fall, we've started a weekly digital Lunch & Learn Series. We help attendees learn the basics of UX Design, Microsoft Excel, and how to start a small business with the help of Small Business Administration, Nebraska Enterprise Fund, Job Share Connect, and other organizations working to end the technology skills gap.

TECH REFRESH

As the 1st technology library in the U.S., it's vital that Do Space remains high tech. Thanks to the generosity of the Charles E. Lakin Foundation, Inc., Do Space is refreshing our public access computers and laptops. Additionally, we're upgrading our servers and adding new maker equipment to the 3D lab.

The upgrades will improve access to technology and training to support Omaha for the future of work, school, and community life.
